DETAILED ACTION

1. This Office Action is responsive to the Amendment filed on 12/11/03.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1 and 2 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 7 of U.S. Patent No. 6,603,800. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 7 encompasses the limitations of claims 1 and 2 of the instant application.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites the limitation "a chipping rate of the first spectrum signal is at least 80 ns". This limitation renders the claim indefinite because "at least 80 ns" is an open-ended range.

Art Unit: 2631

Claim 4 recites the limitation "the timing difference is tracked with a precision of at least 1/16th of a chip. This limitation renders the claim indefinite because "at least 1/16th of a chip" is an open-ended range.

Allowable Subject Matter

6. Claims 5-7 are allowed.

7. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claim 4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

9. Applicant's arguments filed on 12/11/03 have been fully considered.

The objections to Drawings and Specification are now withdrawn since the specification has been amended to overcome the objections.

Applicant's argument with respect to rejections to claims 1-7, under 35 USC 112, first paragraph, is render moot. The rejections are now withdrawn.

The rejections to claims 1-7, under 35 USC 112, second paragraph, are now withdrawn since claim 1 and 5 have been amended to overcome the rejections.

However, claims 1, 2 and 4 are deemed to be rejected with reasons set forth above in this Office Action.
